Complete Scope of the examination and Expanded subtest descriptions:

1. Preparing written material

These questions test for the ability to present information clearly and accurately, and to organize paragraphs logically and comprehensibly. For some questions, you will be given information in two or three sentences followed by four restatements of the information. You must then choose the best version. For other questions, you will be given paragraphs with their sentences out of order. You must then choose, from four suggestions, the best order for the sentences.

2. Interpreting and applying written Social Welfare program materials, and using basic arithmetic in determining eligibility for assistance

You will be presented with written passages related to Social Services policies and procedures and be asked to interpret their meaning and/or apply this material to hypothetical case situations. Secondly, you will be given sets of written instructions and regulations regarding such Social Services programs as cash assistance, medical assistance, and Supplemental Nutrition Assistance Program (SNAP) benefits.

You must read and understand the instructions given, including schedules of arithmetic figures, and apply these instructions to hypothetical case problems. Some questions require using arithmetic to compute the correct amount of assistance.

Previous knowledge of Social Services programs or the eligibility process is not required.

3. Interviewing

You must apply principles and techniques of interviewing to such problems as asking and answering questions, explaining requirements and helping the client understand his or her responsibilities, helping the client feel at ease, structuring and controlling the interview, reacting appropriately to inconsistencies, dealing with a variety of feelings of clients, maintaining confidentiality, and identifying the need for and making appropriate referrals. In addition, some questions may deal with contacting or interacting with other community organizations and agencies to benefit the client or the general public.

4. Supervision

These questions test for knowledge of the principles and practices employed in planning, organizing, and controlling the activities of a work unit toward predetermined objectives. The concepts covered, usually in a situational question format, include such topics as assigning and reviewing work; evaluating performance; maintaining work standards; motivating and developing subordinates; implementing procedural change; increasing efficiency; and dealing with problems of absenteeism, morale, and discipline.
